VERT. ACCURACY:

STATE OF WISCONSIN) COUNTY) KENOSHA

SS

As Kenosha County Surveyor, I hereby certify that following highway reconstruction, I set a 10-inch-diameter by 4-footlong poured-in-place concrete monument with SEWRPC brass cap to mark the location of this closing corner on the township line; replacing a concrete monument with Kenosha County brass cap found and referenced by me on February 11, 1987; said concrete monument having been set to mark the location of this closing corner on the township line in August 1985 by Robert L. Smith, S-190, former Kenosha County Surveyor; replacing a cast iron plate in the then existing pavement set to mark the location of this closing corner on the township line in May 1968 by Donald E. Zenz, S-1088, Racine County Engineer; replacing a one-inch-diameter iron pipe found by Mr. Zenz and accepted as marking the location of this closing corner on the township line at a distance of 74.10 feet west of the standard corner then marked by a cast iron plate set in the then existing pavement--the closing distance recorded in the original U.S. Public Land Survey notes dated January 16, 1836, being 73.92 feet; that I have referenced the same as shown hereon; and that this record is correct and complete to the best of my knowledge and belief.
